MDS Spring22

15/11/23

What is the exact form of our diploma work? Detailed list of standards and criteria to be taken into consideration? And how will the process of performance look like?
- https://www.hse.ru/ma/mds/internships

Part 1

Thesis abstract . It is a short summary of the thesis content and objectives. It includes a clear statement of the problem, why it is of interest or importance, and how it connects research and innovation.

Part 2

Table of contents: Headings and page numbers. The headings in the table of contents should be exactly the same as those in the text.

Part 3

Introduction demonstrates the reasons for the choice of topic and state the objective of the research, the subject of the research, research tools and practical value.

Main Part

o A description of the history and background literature on the subject.

o Statement of the research problem.

o A statement of the methodology defining the author's specific design, data collection, analysis, and interpretation.

o Results

o A discussion of the innovation and research findings in relation to those of predecessors.

o Justification of research relevance is mandatory. Include explanation of its value from the point of view of innovation and its application

Part 5

Conclusion. The author's conclusions and suggestions based on research results for further work.

Part 6

Bibliography. Specific bibliographic citations should be included whenever reference is made to documents or other communications.

Part 7

Appendices. Extensive data, code, or mathematical derivations should be in appendices rather than in the body of the report.
